TO WHOM IT MAY CONCERN

This is a letter of recommendation for Mr. Mark Muratore of Concrete Results, Inc. whom we have known professionally for almost 25 years.

We first met when Mark was General Manager of Pavestone Company's plant in Kansas City and where he was using the products we were selling to Pavestone Company. Over time, we got more closely acquainted with Mark and have come to appreciate him as a reliable and fair, highly intelligent, business partner who was always straight in his dealings with us.

Owing to his capabilities and his results-driven practical intelligence Mark eventually moved up through the ranks of Pavestone Company and, before long, was promoted to Vice President of production. He also became one of the trusted lieutenants of Pavestone's owner, Bob Schlegel and was part of Pavestone's inner management circle.

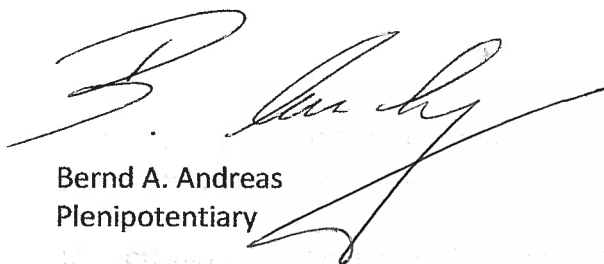

Before leaving Pavestone to start his own business, Mark Muratore was running Pavestone's Veneer Stone business as de facto President, starting new production facilities and opening new distribution channels for the company

We know that, since starting his own business about 10 years ago, many companies have used, and profited from, Mark's profound knowledge of the Concrete Products industry to improve their internal processes, sharpen their marketing tools and improve their profitability.

Mark is highly thought of in the industry. Our own business dealings with him over many years have been nothing but positive. This is why we have no hesitation in recommending Mark Muratore as a business associate or consultant to whoever may have recourse to his services.
