

Turn to InnovaCast for the most innovative system of molds and wetcast machinery.

The people behind InnovaCast, Inc have not only been involved in the design and installation of wetcast & stone veneer machinery, but of equal importance is our expertise in actually running these plants and producing high quality products. The team at InnovaCast have been involved in concrete product manufacturing for over 30 years and understand what it takes to design a factory to make the right product for your needs and build into that design the systems to be able to operate your plant efficiently and at a profit.

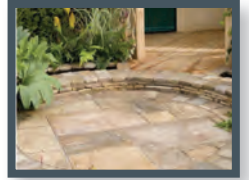

Let us use our knowledge and experience to improve every aspect of your business.

The most innovative systems and molds

InnovaCast offers systems of varying production capacities and levels of automation along with our new U.S. manufactured molds:

- Forklift or finger/transfer car transport systems
- Large, medium, and small production formats
- Use with all types of mold materials:
 - Our **NEW InnovaCast Molds** made with **TEP**
 - ABS
 - Urethanes
 - Latex
- Robotic, vacuum, and hand cubing systems
- Combined or separate wet and dry lines
- Various types of dosing mechanisms:
 - volumetric
 - weight based
- Modular component design to maximize your initial capital investment and permit expansion at your pace
- Plus we are a full range equipment provider and can include mixing, batching, and curing systems to complete your ENTIRE project.

Success requires hands-on experience and that is why InnovaCast has become the North & South American agent for the clear leader in wetcast machinery, CTI Wetcast of Bristol England. The team at CTI Wetcast has installed over 200 wet cast systems globally in the last 25 years. Working side-by-side we can provide machinery and engineering innovations to service the needs of both the manufactured stone industry and those of the wetcast slab producer. Together we bring real operational experience into your project.

CTI Wetcast is a member of the PEC Group of Companies which includes Portishead Engineering & Construction and Dudbridge Engineering. The group possesses great capacity for manufacturing, engineering, technological innovation, and custom design for your specific needs.

Contact us today to see how we can bring efficiency and labor savings to your stone veneer or wetcast manufacturing plant!
